

TESTIMONIALS

“I called the local tool rental and asked them about renting a machine to sand my floors. They asked me which machine I would like. ‘Ummm..What kinds are there?’, I asked. That’s when they told me about the **U-Sand®** machine. The next morning I rented the machine and bought all the necessary items to refinish my floors(including the dust masks that I was told were a necessity).

‘The machine was amazing!’

It wasn’t until I was at least a half hour into the sanding that I realized that I wasn’t even wearing the dust mask! I never even had to open the package. I ended up calling one of the friends that told me to hire someone else to do my floors and had him come over to check out the **U-Sand®** machine and he was amazed as well! The floors look amazing and now I’m the one that all my friends call about refinishing hardwood floors. Thanks to you I didn’t have the horror stories that everyone had told me, and neither will anyone that asks me about refinishing hardwood floors.”

Thanks,
Kyle Eastland
